

02.10 M: P0 Demo Continued: Box and violin plots, encoding, sklearn, linear regression, Markdown [PDSH 3]

Completion requirements

- Topics: **Data Preparation with Pandas**
 - Getting started with [pandas](#)
- Reading: [PDSH Ch. 3](#) through the section Hierarchical Indexing
 - Note: Yes, it's a long chapter. Please read through it, making notes for later reference and so you can find things when needed. You will get much more acquainted with the pandas tool in the lab. The more time you spend working through the chapter, the faster you will complete **all** of the future labs. We will devote two days of class to Pandas this year.
- Resources:
 - [Pandas Tutorials \(official site\)](#)
 - [Pandas Manual](#)
 - [Pandas: Comparison with SQL](#) (official site)
 - For those who want to learn more about NumPy, see [Chapter 2: Introduction to NumPy](#) in PDSH.
 - Also: [The NumPy Book \(MIT Press\)](#)
