

02.19 W: Demo: Exploring Text Embeddings with NumPy and Matplotlib [PDSH 2, 4]

Completion requirements

- **Topics:**
 - Semantic embeddings and applications
 - [Matplotlib](#)
 - [Seaborn](#)
 - [NumPy](#)
- Reading: [PDSH Ch. 4](#) (Note: Again, the link is just to the chapter intro. Follow the links.)
 - Again, this is a long chapter. Skim it so you know what Matplotlib, Seaborn, and similar data visualization tools can do and so you know where to turn for detailed information on these tools. The more familiar you are with these tools, the faster your data analytics work will go!
- Resources:
 - [Official Matplotlib Documentation](#)
 - [Official Seaborn Tutorial](#)
 - [Embeddings Guide \(OpenAI site\)](#)
 - For those who want to learn more about NumPy, see [Chapter 2: Introduction to NumPy](#) in PDSH.
 - Also: [The NumPy Book \(MIT Press\)](#)
